

SprinterSANICID

Sanitary cleaner

Composition:

SprinterSANICID contains: less than 5 % non-ionic surfactants. Other ingredients: Alcohol, organic acid, colorant and scent. pH value approx. 3.

Performance:

SprinterSANICID is a ready-to-use sanitary cleaner for quick and easy removal of all dirt in sanitary areas. Thanks to its special composition, SprinterSANICID combines outstanding removal of mineral-based dirt, such as lime-scale, with excellent emulsification of oils and greases, such as those from the skin or used in cosmetics. SprinterSANICID also removes soap remains and other unavoidable types of dirt, so that after cleaning, sanitary surfaces are restored to their original shine. The good spray properties of the product further support the cleaning performance, so that with regular use, you can dispense with more aggressive products with a high acid content. Thanks to its intensive and characteristic scent, SprinterSANICID leaves behind a lingering, clean smell in the room which emphasises the performance of the product. The red colouring of the composition indicates the application area of SprinterSANICID and provides additional safety in use. The ergonomic 750 ml spray bottle is quick and easy to use, like all Sprinter products, and the spray bottle guarantees economy of use. Consumption of the product is minimised, with only 4-5 squirts being needed per m².

Application:

The environmentally friendly and mild composition of SprinterSANICID allows it to be used safely throughout the whole bathroom and sanitary area, such as in hotels, office buildings, public and private facilities. SprinterSANICID is ideally suited for regular daily cleaning of wash-basins, fittings, tiles, ceramics, showers etc. Do not use on materials sensitive to acids, such as marble.

Use:

SprinterSANICID should be applied on small areas or fittings using a suitable cleaning cloth, or sprayed directly onto the surface to be cleaned, left to work for a short time, and then wiped off or rinsed off with water.

Ecology:

This product is subject to regulations governing the environmental compatibility of washing and cleaning agents and the associated regulations on the biological degradability of the raw materials used.

Comprehensive information on the environmental characteristics of this product is available on request.

Dispose of the empty packaging as recyclable waste.

This product is intended for commercial use.
